REPORT OF SEMINAR ON “PLA & AUTOMATION IN ELECTRICAL ENGINEERING” BY ELECTRO TECH SYSTEMS (ETS)

The Head of the department, **Dr.K.C.Jayasankar** welcomed the guests from Electro Tech Systems (ETS) and the gathering (Faculty members, third and second year EEE students).

Ensuing to the welcome address, Mr. Suryaprakash, Technical Director from ETS delivered the first session. In his presentation, he described about the basics of electrical engineering and need for automation. He also explained the concept of Programmable Logic Controller (PLC) and its role in Automation industry. He also shared his experience from an engineering graduate to an Entrepreneur.

The second session was handled by **Mr. Arun**, Technical Head, ETS. In his session, he shared the pros and cons of core and IT industry jobs. Further, he briefed about the need of a young entrepreneur for this society. He also invited our faculty members and the students to visit their PLC and Automation laboratory. Finally, they invited our students to participate the free embedded workshop to be organized by them on 28.7.2018 (Saturday) at their company premises. The interaction between the facilitators and the participants was so effective. At the outset, it is concluded that this seminar would serve the purpose of what it was intended.
