DAY WISE ACTIVITIES

AMCAT tests students from different fields in various domains with the help of an in-depth micro analysis in each domain.
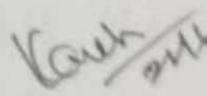

The test consists of various sections/modules which you can choose according to your profile or education background. There are certain modules which are compulsory for everyone (Language and Aptitude Modules), whereas others are optional. During the test, you will be given an option to select any two domain specific modules. It is recommended to that you go through the module description and befitting job profiles before you go to take the AMCAT. Your choice of modules increases your visibility for particular kind of jobs, for instance, if you take the Programming Module, you will be visible to more IT companies whereas taking a HR module will help you find HR profiles. It is best for you to go through the module list now and decide which optional modules you would like to take.

Provided below is the list of all the modules that you can take in AMCAT, the broad topics that a module would cover, relevant job profiles, number of questions, duration and some sample questions for each module
