

22. GREEN CAMPUS POLICY

PERI Institute of Technology is deeply committed to safeguarding its environment through its green campus initiatives. A Green Campus embodies the fusion of environmentally friendly practices and education, fostering sustainable and eco-conscious behaviours within the campus community. Environmental awareness is ingrained in the institute's mission, with tree planting being a central focus for maintaining the campus's pristine beauty and creating an ideal setting for academic and extracurricular pursuits. The entire campus is adorned with lush green landscaping, including verdant grass, decorative plants, and shaded trees, resulting in a visually stunning and pollution-free environment conducive to learning. The college takes great pride in this green atmosphere, which not only enhances the educational ambiance but also underscores its commitment to conserving natural resources and preserving the campus ecosystem as outlined in its Green Policy.

- 22.1** Foster environmental awareness among students and stakeholders, emphasizing their responsibility to undertake eco- friendly initiatives for environmental preservation.
- 22.2** Empower students to engage in small-scale efforts to protect and conserve the environment and sustain natural resources within the campus.
- 22.3** Raise awareness among students and staff regarding responsible water usage, minimizing unnecessary wastage.
- 22.4** Safeguard and preserve natural resources within the campus environment.
- 22.5** Incorporate environmental considerations into community development policies, programs, and outreach initiatives.
- 22.6** Regulate and minimize vehicle usage on campus.

- 22.7** Ensure the judicious use of environmental resources to meet both present and future needs.
- 22.8** Transition the campus to become plastic-free.
- 22.9** Gradually implement rainwater harvesting techniques on campus.
- 22.10** Enhance the efficient utilization of all resources, including energy and water, while reducing waste generation and promoting recycling where feasible.
- 22.11** Protect the campus's flora and fauna.
- 22.12** Conduct regular audits to enhance the efficient use of resources, including energy and water, and to minimize waste production, with a focus on recovery and recycling.
- 22.13** Encourage the adoption of digital technologies to minimize paper usage.
