Date: 18/02/2023

The Department of Computer Science and Engineering is organizing a **WORKSHOP** in
Topic: "WEB DEVELOPMENT" for third years and final years on 20/02/2023 (Monday)
from 10 am.

I request all the faculty members and students to attend the workshop and we are
expecting your coordination throughout the session.

WORKSHOP ON “WEB DEVELOPMENT”

Report

A workshop on the topic “**Web Development**” was organized by the Department of Computer Science and Engineering, on 20th February 2023 by 10am. It was organized for the third year students of Computer Science and Engineering department. **MS. Jayasri Venkataraman, WEB DEVELOPMENT, Kanan International Pvt Ltd, Chennai** was the guest speaker of the day.

The workshop was conducted in **Conference Hall** at **PERI Institute of Technology** with the students participants were provided with the necessary technical support to take part in the workshop session.

The workshop began with a formal welcome note by Ms. Lavanya B, 3rd year CSE, presided by Mrs. Varalakshmi Krishnan HOD, CSE. The speaker, **MS. Jayasri Venkataraman** accepted the invite. Having years of experience in Web development, she commenced his speech and focused towards how the students should prepare themselves for setting up a successful career. She discussed with the students on effectively planning before starting the actual development. Also she explained the growing technology which enables computers to learn automatically from past data. Also she gave clear points on, how web development used for closely related to the job of designing the features and functionality of apps (web design). The term development is usually reserved for the actual construction of these things (that is to say, the programming of sites). The basic tools involved in web development are programming languages called HTML (Hypertext Markup Language), CSS (Cascading Style Sheets), and JavaScript. There are, however, a number of other programs used to “manage” or facilitate the construction of sites that would otherwise have to be done “from scratch” by writing code. A number of content management systems (CMS) fall into this category, including WordPress, Joomla!, Drupal, TYPO3, and Adobe Experience Manager, among others.

Dr. R. PALSON KENNEDY, M.E., Ph.D.,
PRINCIPAL
PERI INSTITUTE OF TECHNOLOGY
Mannivakkam, Chennai - 600 048.

MS. Jayasri Venkataraman explained Front-end development involves the “client-facing” side of web development. That is to say usually, front-end web development refers to the portion of the site, app, or digital product that users will see and interact with. A Front-End Developer, therefore, is responsible for the way a digital product looks and “feels,” which is why they are often also referred to as Web Designers. Front-End Web Developers focus on translating website design and visual ideas into code.

She explained from basics up to creating new method with simple concepts and discussing the shortcomings of a finished project can do wonders for future projects that have a similar scope. Then, how the project will be built should be defined and Full stack developer is someone familiar with both front- and back-end development. Full Stack Developers usually understand a wide variety of programming languages and because of their versatility, they might be given more of a leadership role on projects than developers who specialize. They are generalists, adept at wearing both hats, and familiar with every layer of development. Obviously, employers want to hire Full-Stack Developers – according to an Indeed study, they are the fourth-most in-demand job in tech.. The product is maintained for a while until they decide to retire the product.

She elaborated with the highest level of programming and management control. Programmers are more efficient because they are informed and guided on what they should create and why conveyed the importance of web development and how its applications were in the world is filled with lot more dimensions of usage. To set up a successful career path, today's students must also be out-of-box thinkers in various dimensions.

The students listened to his words enthusiastically and voiced their doubts during the query session.

The lecture ended with a formal vote of thanks delivered by staff Mrs. Varalakshmi Krishnan, HOD/CSE, wherein he expressed his gratitude to the guest speaker, **MS. Jayasri Venkataraman**, the management and the department for providing such a valuable session.
