CIRCULAR

Ref: PERIIT/CSE/ 2022-2023 EVEN/06

Date: 16 /02/2023

The Department of Computer Science and Engineering is organizing six days **WORKSHOP** in Topic: **"ARTIFICIAL INTELLIGENCE"** for second years from 21/03/2023 (Tuesday) to 28/03/23 (Tuesday) at 10 am.

I request all the faculty members and students to attend the workshop and we are expecting your coordination throughout the session.

PERI INSTITUTE OF TECHNOLOGY
DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
WORKSHOP ON “ARTIFICIAL INTELLIGENCE”
Report

A One week Workshop on the topic “Artificial Intelligence” was organized by the Department of Computer Science and Engineering, through PERI IT EDC and Institution Innovation Council, on 21st March 2023 by 10.00 am. It was organized to the Second year students of Computer Science and Engineering department. **DR. B. Ezhilavan, Founder & CEO, VEI Technologies, Pvt Ltd, Chennai** was the guest speaker of the day and the Trainer’s members are **P. Shobana Pritha** and **Mr. Mukesh**.

Speech DR. B. Ezhilavan

The resource person given an introduction about their VEI Technologies which is located Chennai. He said that, they are the leading solution provider for web development, application development, web service, mobile application etc. He said about the Establishment of VEI technologies in the year 2012.

He said that there are providing various services on Application program, Application software Engineering Outsourcing Consulting. He also said that, they are conducting various

PERI INSTITUTE OF TECHNOLOGY
Mannivakkam, Chennai - 600 048.

workshops and internships for students in various domains in various colleges all around the Tamil Nadu.

Session Day 1

The session started with the speaker **Mrs. P. SHOBANA PRITHA**. She started the brief introduction about AI and the way through which the AI evolved in the World. She also explained about the communication between the AI and the Human Brain and the way through which the functions of AI works. She also discussed about the interaction of AI which evolves the human brain to do things like, Human to think like Human beings etc...

She end the day 1 session by saying “Anything that could give rise to smarter-than-human intelligence - in the form of Artificial Intelligence, brain-computer interfaces, or neuroscience-based human intelligence enhancement-wins hands down beyond contest as doing the most to change the world. Nothing else is even in the same league.”

Session Day 2

Hands on Training

Students started to learn the AI through hand practice mode, Trainer thought the students to develop a game using the AI domain which will contains the Multiplayer or playing with the Computer itself.

Block Game

Trainer had given the colour combination blocks game and they asked the students to change the colour of the blocks and also they asked students to change the coding for the shapes and to set background for the game.

Session Day 3

Trainer had given coding's to students which are related to games and asked them to do the changes in the coding so that they can get deep learning in the AI coding's. Trainer had given Ludo game basic coding and they asked the students to creating the board, moving the buttons, they also to change the colours of the board, buttons , movement etc.

Trainer had also given the coding's for creating the chess game where the students are asked asked to combine the coding's for the game and the movement of the chess pieces in the direction to which they can win the game.

Fig 5 : Students working on game codings

Session Day 4

On day 4, the trainer said about what are the different types of AI such as General AI, Narrow AI and Strong AI.

She said to the students about the differences. Narrow AI is programmed to operate within a set of pre-defined functions to complete or address a specific problem. Strong AI will have a mind of its own and will be able to accomplish any type of task that its 'mind' can envision.

She also said, while narrow AI refers to where artificial intelligence has reached today, general AI refers to where it will be in the future. Also known as artificial general intelligence (AGI) and strong AI, general artificial intelligence is a type of AI that can think and function just as humans do.

Session Day 5

Trainer said that to the students, by discussing various applications and the technologies of the AI, students had done some hands on practice programs such as games, quiz, and so on. Students also done many more projects for a whole day such as currency converter, password manager, path finder, nba score, solar system etc....

Session Day 6

The students presented their AI oriented projects one by one and also presented their models in front of the trainers and faculties. Each team is given a 15 minutes to present their project.
