GUEST LECTURE ON “MACHINE LEARNING”

Report

A **Guest Lecture** on the topic “**Machine Learning**” was organized by the Department of Computer Science and Engineering, on 13th February 2023 by 10am. It was organized for the third year students of Computer Science and Engineering department. **Ms. M. Ganga, Machine Learning, RETECH Solutions Pvt Ltd, Chennai** was the guest speaker of the day.

The workshop was conducted in **Conference Hall** at **PERI Institute of Technology** with the students participants were provided with the necessary technical support to take part in the workshop session.

The workshop began with a formal welcome note by Ms. Lavanya B, 3rd year CSE, presided by Mrs. Varalakshmi Krishnan HOD, CSE. The speaker, Ms. S. Ganga accepted the invite. Having years of experience in Machine Learning, she commenced his speech and focused towards how the students should prepare themselves for setting up a successful career. She discussed with the students on effectively planning before starting the actual development. Also she explained the growing technology which enables computers to learn automatically from past data. Also she gave clear points on, how machine learning used for various tasks such as image recognition, speech recognition, email filtering, Face book auto-tagging, and recommender system. She elaborated machine learning algorithms build a mathematical model that helps in making predictions or decisions without being explicitly programmed.

Ms. M. Ganga explained the need for machine learning is increasing day by day. The reason behind the need for machine learning is that it is capable of doing tasks that are too complex for a person to implement directly. She moved on with the performance of the machine learning algorithm depends on the amount of data, and it can be determined by the cost function. With the help of machine learning, how we can save both time and money. She gave some key points which show the importance of Machine Learning: Rapid increment in the production of data, solving complex problems, which are difficult for a human, Decision making in various sector including finance, Finding hidden patterns and extracting useful information from data

She explained from basics up to creating new method with simple concepts and discussing the shortcomings of a finished project can do wonders for future projects that have a similar scope. Then, how the project will be built should be defined. The process continues to analysis, design, program, execution, user satisfaction. This will be followed by deployment so the project will be useful to the clients. The product is maintained for a while until they decide to retire the product.

She elaborated with the highest level of programming and management control. Programmers are more efficient because they are informed and guided on what they should create and why conveyed the importance of Machine Learning and how its applications were in the world is filled with lot more dimensions of usage. To set up a successful career path, today's students must also be out-of-box thinkers in various dimensions.
